CHEMOTHERAPY SCARRING

"This customer recently went through topical Chemotherapy on her face using Fluorouracil (FU5) which caused scars. She felt that topical chemotherapy treatment was her only option, and applied it 2x a day for 3 weeks. It was very painful and her skin was "red and beefy" 3 days shy of 3 weeks, so she quit the topical treatment. The deep scars were underneath her skin, so texture is smooth but the color was very red.

She began using Recovery serum and contacted us to discuss product usage. We recommended the following products: Cleanser, Recovery, Eye Serum, Moisturizing Mist and Barrier Renewal Cream – 2x daily. These before and after photos were taken 3 weeks apart." – TN

CHEMOTHERAPY

"After experiencing severe scarring and painful side effects while undergoing chemotherapy treatment using Fluorouracil (5FU), TN started to use the NeoGenesis products before her next round of chemo on her chest area. She was very excited to try the products on her chest to see if they would provide some relief to her skin issues during the treatments.

The NeoGenesis products really made her skin feel better and she was amazed at the results. The skin recovered so quickly. The difference between the chemo side effects on her face (see chemotherapy scarring photos above) and her chest is incredible. She was not feeling any pain at all on her chest.

Note: The redness on her chest is just her skin hue, as her chest is always kind of red."

CHEMOTHERAPY

"I was in an incredible amount of pain from severe burns I experienced as a result of topical chemotherapy treatment for vaginal cancer. I didn't know what to do, so I reached out to NeoGenesis.

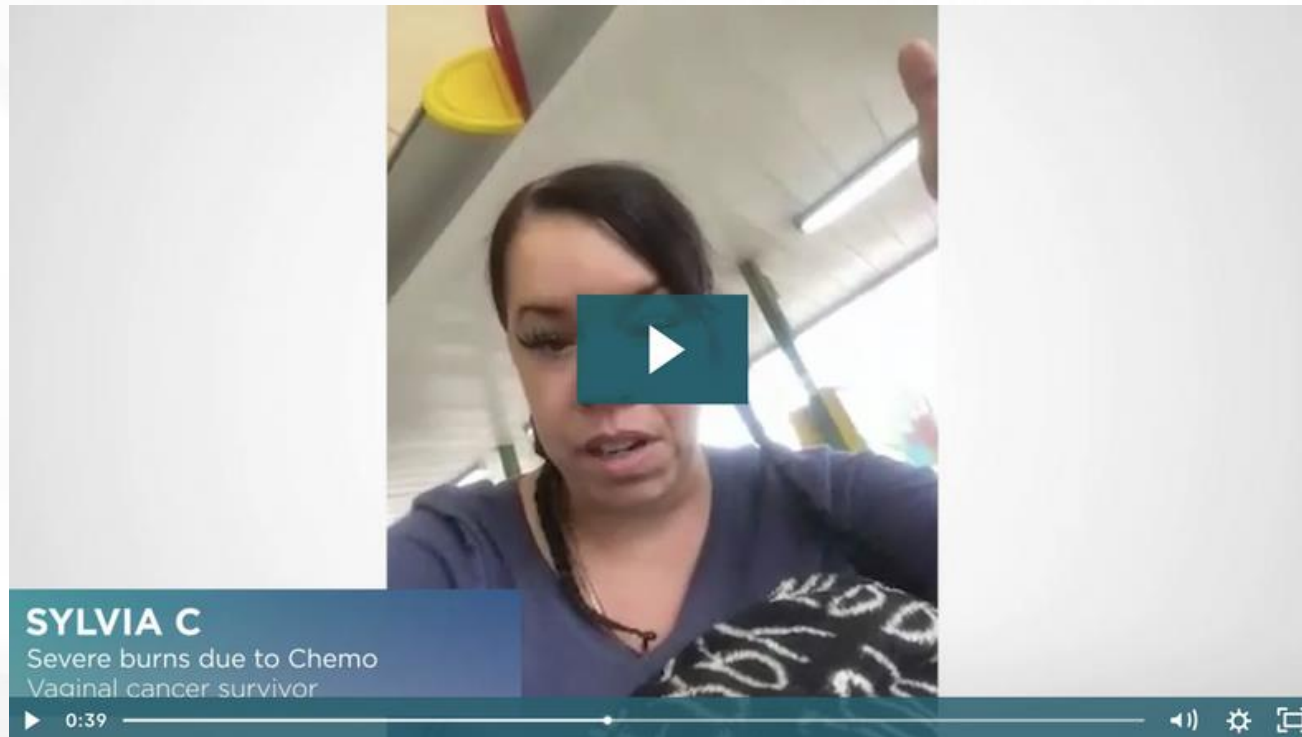

They shipped out the products really fast and the healing was immediate. The relief that came right afterwards was comforting and felt so much better. And I remember the first night, going to bed and I wasn't just laying there in excruciating pain and I could actually sleep. It was so nice.

Within that same week I was able to get up and move around. I had been immobile that entire time. So being pain free, moving around was just wonderful. - SC

CHEMOTHERAPY + RADIATION

I have a chronic case of squamous cell carcinoma that started in the mid-1990s as leukoplakia / dysplasia on the gums and finally presented itself twice (2003 and 2009) as full-blown tumors in my lower jaw. The last tumor was so aggressive that it also required an extremely toxic experimental chemotherapy cocktail, followed by the surgical removal of almost all of my lower jaw, gum tissue, and chin skin. These were reconstructed with a fibula bone for the jaw and vascularized free flaps from my thigh for both gum and chin that were micro-surgically connected to the neck vascular system. One month after the surgery I had a 6-week course of head and neck radiation. There really is no way to adequately describe how awful and painful all this was.

For the next 6 years, I dealt with the “collateral damage” from the toxic treatments. My tongue lesions would take 4-5 months to heal. I suffered from severely burned facial and neck skin (I call it

“mother of all laser peels”). Despite the many products MD Anderson gave me, and I found on my own, the problems I had would not go away. Then I met NeoGenesis. The Recovery serum NeoGenesis provided me has reduced my healing time on tongue lesions down to 2 weeks or so and I get them far less often. In fact, Recovery actually helped prevent the need for another surgery in 2016. After seeing these results, the MD Anderson team is very interested in learning more about this product. The Skin Serum and Intensive Moisturizer also really helped with the residual redness and the skin on my face and neck. These products have significantly reduced the irritation for the first time in 6 years.

We have got to get the oncology world to know about NeoGenesis. Please let me know any way I can help.”

HOPE + RELIEF

Jennifer Reynolds was the founder of Pink Warrior Advocates. They support cancer patients in many ways. Jennifer suffered from Hand-Foot Syndrome brought on by her chemotherapy. NeoGenesis solved the issue.

CHEMOTHERAPY

"The Recovery serum is my favorite thing. My skin is so happy. It's just wonderful. I don't feel any of the dryness and tightness. My face feels like a baby. And the Moisturizing Mist, I spritz it all day long.

It's really amazing what you guys have done for me. If I had to worry about the things that you have helped me with, it would have made this whole journey so much more difficult. The things that you have helped me with: my scalp, and my mouth, and my vagina for goodness sake, are things you just don't think about, you don't realize they are going to happen. That they didn't have to be so horrible. That I didn't have to think about it, that it didn't have to be a traumatic experience, means the world. Because if I didn't have you guys, it would have been so much worse.

I just can't say enough good things about you."

CHEMOTHERAPY RASH

"I would like to say thank you so much for sending the products. I am completely in love.

As you know I take chemotherapy, called Rituximab. The infusion causes a serious rash. I have applied Nystatin powder prescribed by my doctor, but that requires at least a week for some relief and several weeks to totally heal.

After just one treatment visit and the products they gave me (Recovery + Intensive Moisturizer) I am in less discomfort." – HB

CHEMOTHERAPY

"I was in so much pain. The doctors have no clue how much Fluorouracil hurts. I wish they had to experience it. They only offered Aquaphor which did nothing for me.

I can't believe how much improvement there is! No more burning, pain or open sores. Does not hurt or sting when gently washing my face with my fingers. No more peeling and do not need as much moisturizer. I am not brushing my hair in front of my face now to hide the damage. There are spots and redness which I imagine will take longer to go away or get less, but I almost look human without makeup!

All I can say to you is that I could not be happier with how things worked out. It is like a miracle as far as I am concerned. Unbelievable. I now look like a normal person, even without makeup on.

Also, the most important thing, no pain, which diminished pretty quickly when I started your products. I am thrilled with that and would recommend your products to anyone. In fact, when I go into my doctor for my 3-month check-up I will bring some information on it with me because they should be promoting it in their office if they are going to be doing those kinds of procedures and others. They do other types of surgeries there too." – Beth S.

CHEMOTHERAPY RASH

“I had a severe skin reaction from 2 powerful chemotherapy drugs (Adriamycin / Cytosin) that were administered every other day for 4 weeks.

The worst reaction was on my legs which had raised red areas and many of these were blisters. We had tried Calendula Oil by Bodyceuticals. The rash would subside and then come back worse than before.

Tracy introduced me to NeoGenesis Recovery serum. I applied it twice a day to the affected areas. In one week, I had a huge improvement. The redness faded, the raised areas diminished, the blisters went away, and the itching stopped.

Recovery serum is my holy grail. I highly recommend it to anyone with skin issues from chemo.” – CP

Recovery

"This patient was receiving chemotherapy and broke out in a rash on her legs. She agreed to test the NeoGenesis Recovery serum on her right leg only.

On the 7th day of using Recovery, the patient reported significant reduction in irritation and pain on the right leg (being treated). The healing of the open wounds was also visible on the right leg as compared to the left leg.

She requested to begin using Recovery on both legs, starting September 24th.

On October 22, 5 weeks into using Recovery during chemo, the patient experienced healing of the open wounds on both legs. Patient reported being much more comfortable despite the ongoing chemo treatments.

She reported that pain, irritation, and itchiness were all reduced substantially once she began using Recovery serum midway through her chemo treatments. She loved that her wounds healed even while she continued her chemo treatments." – L

CHEMOTHERAPY RASH

"I was on Doxil chemotherapy and was experiencing various side effects including a severe skin reaction that turned my hands bright red, and both my hands and feet were peeling.

I started using your products: Recovery serum, Barrier Renewal Cream, Moisturizing Mist and the Cleanser and within 2 weeks even my eczema and rosacea had improved.

I also had delayed chemo burns, which felt like an acid burn. My elbows were horrific, my bottom, underneath my breasts, my armpits and down my sides looked like a chemical burn. It even ran all the way down my legs and became super sensitive. I started using the Cleanser on my entire body and face and my skin improved within 2-3 days. Drastically improved. So, your products are miracle drugs. They are wonderful" - AK

CHRONICALLY DRY SKIN

"My client was diagnosed with ovarian cancer in 2020 and had 2 major surgeries, as well as chemo. The cancer came back in 2022 and she began chemo again, and will be receiving 129 doses. One of the side effects of the chemo treatments was extreme dryness. She felt like her skin was aging quickly.

I started her on the NeoGenesis products and within two months her skin was feeling better and the dry skin concerns were not an issue anymore. Her face is feeling so good! She loves how the products absorb in the skin and are not greasy."

ANAGEN EFFLUVIUM (CHEMO)

"This client was dealing with the side effects of chemotherapy when she started on the NeoGenesis hair products 4 months into her chemo treatments. She was experiencing rapid hair loss, including her lashes and brows. She was completely bald in areas and had lost most of her lashes and brows.

She started using Hair Thickening Serum and NeoLash (for both lashes and brows), twice daily for the first 30 days, and then once a day after. We started to see new growth very quickly, especially her hair. In less than 6 weeks it had filled in all the bald spots. Her brows also grew back quite quickly, while her lashes took some additional time, which we expected.

She is very happy with the products and looks amazing! - DH

ANAGEN EFFLUVIUM (CHEMO)

"I experienced hair loss during chemo. I had extreme thinning and bald spots and imagined it would be months and months before it would fill back in.

I started cold capping and using NeoGenesis Hair Thickening Serum twice a day.

My husband can't believe my hair has grown back so fast, and neither can I. My hair is thicker than before and regaining length. I do not have any thinning or bald spots anymore.

Really happy!" - MMZ

LASH + BROW LOSS

"I lost my eyelashes and eyebrows during chemo. I started using NeoLash and NeoBrow and could not believe how quickly they are coming back. I expected more to fall out.

I did end up losing all my eyelashes, but they are growing back quickly. My eyebrows thinned but never fully fell out.

I don't wear makeup a whole lot, but I am able to wear mascara now." - MMZ
