

## Professional Treatment

**Time:** 60 minutes

**Cost Per Treatment:** \$1.37\*

*\*Assumes all Back Bar sizes.*

### Suggested Products:

- Cleanser
- Recovery

---

***If possible, pre-treat the skin for a minimum of 2 weeks before treatment with Recovery and Barrier Renewal Cream twice daily to strengthen the skin and improve treatment results.***

**STEP 1:** Help your client settle into the treatment by dispensing a few drops of essential oils onto your palms. Place your palms over your client's face and instruct them to take a deep breath in to invigorate the senses. Leave your palms in place for another minute while encouraging deep breathing to help your client relax.

**STEP 2:** Double Cleanse with NeoGenesis gentle gel-based **Cleanser**.

**STEP 3:** Apply numbing cream to the area(s) being treated. Cover with saran wrap and let the client numb for at least 45 minutes. Remove numbing cream in small sections to ensure client comfort during the procedure. Leave numbing cream on other areas until you are working on that section, so the client stays numb.

**STEP 3:** Perform Spot Plasma Fibroblast treatment.

**STEP 4:** Immediately post-treatment, apply **Recovery**.
