“As a licensed Esthetician, I’ve become a strong advocate for incorporating Recovery in my treatments. I had a client with over-stimulated skin due to excessive use of active products. Initially, her skin reacted severely, but after using Recovery before and after micro-needling, the results were remarkable. These photos, taken immediately and just 20 minutes post-treatment, speak for themselves. **I am a believer and Recovery will definitely be in my protocol for micro-needling.**”
